

AIM Garden Trio

Whole-food Nutrition

The **Garden Trio** provides three powerhouses of plant nutrients: barley leaves, carrots and beets in concentrated juice powders of these three whole foods.

Juice powders give you convenient access to easily absorbed plant-based nourishment. Easy on the digestive system, the Garden Trio delivers superfood powders for supplemental nutrition.

Modern farming practices have lowered nutrient levels in the soil. These days, a harvest of carrots or beets is likely to contain fewer vitamins, minerals, phytonutrients, etc. than they did decades ago.¹ Just Carrots and RediBeets offer an optimal source of the beneficial nutrients found in carrots and beets.

1. bit.ly/SoilDepletion

Each serving of the Garden Trio provides 3 grams of plant protein

If you tried to eat barley grass, its incredible source of nutrients would be wasted by your lack of an enzyme that breaks down the protective fiber. AIM found a way to turn the juice of barley grass into a powder that is bursting with unique green nutrition.

It's Your Choice!

You can take the Garden Trio in a drink that contains one, two or all three whole-food concentrates. It's a mix-and-match choice of beverages, according to your taste and mood.

The AIM Garden Trio has the OK symbol, meaning Just Carrots, BarleyLife and RediBeets are suitable for consumption by those of the Jewish faith. The OK symbol also appeals to health-conscious people who recognize the high quality standards associated with kosher foods.

Each whole-food concentrate in the Garden Trio is gluten-free. According to the U.S. Food and Drug Administration (FDA), for a product to be considered gluten-free, it must have less than 20 parts per million (ppm). BarleyLife, Just Carrots and RediBeets have all met this requirement.

Genetically modified organisms (GMOs) are “bioengineered” plants or animals, using gene-splicing. However, nature creates plants and animals that are NOT genetically modified organisms: Non-GMOs. The Garden Trio and every other AIM product is Non-GMO.

For anyone following a vegan or vegetarian lifestyle, it is essential to know what can and cannot be consumed. The vegan logo indicates products that do not contain animal products or by-products and have not been tested on animals. The Garden Trio is vegan.
